b
Kaub gauge of the week
loading curve: share of the normal tonnage that passes
voyage surcharge = 1 / that share
buyer draws on its stock; loses output when a critical input runs out
delivered (at the new price)
delivered later
shipment on its normal route
pays the surcharge, or takes a cheaper route (mode change costed)
the reach is full: shipments cut in proportion
containers: rail or road
cut share looks for a route around the reach (switching penalty)
bulk: no alternative, back to the supplier
